**GENERAL RULES SECTION** 

#### **NOTES**

#### **GENERAL RULES CHAPTER**

#### Rule 1. APPLICATION OF MANUAL

Throughout this manual "Department" means the Texas Department of Insurance.

Base rates and base premiums mean the Association rates as promulgated by the Department. The rules in this manual apply to the writing of auto insurance in the state of Texas.

- A. This manual is divided into separate Chapters:
  - 1. General Rules
  - 2. Private Passenger
  - 3. Commercial Auto
    - a. Trucks, Tractors and Trailers
    - b. Public Transportation
    - c. Special Types & Operations
- B. If an auto is eligible for classification or rating in more than one chapter of this manual because of its use, use the chapter producing the highest rated classification, unless 80% or more of the use is in a lower rated classification.
- C. All rates and premiums in this manual are annual rates and premiums unless otherwise specified.
- D. When the symbol (a) is shown, it indicates that an endorsement is used.

#### Rule 2. PREMIUM CALCULATION

**(e)** 

- A. Calculate the premium for each coverage and exposure for which a separate premium is shown on the policy, as follows:
  - For new policies issued for a term of one year use the premium tables and rates in effect on the policy inception date.

For renewal policies issued for a term of one year use the premium tables and rates in effect on the policy renewal date.

 For new policies issued for a term greater than one year, use the premium tables and rates in effect on the policy inception date for the first year and the premium tables and rates in effect on each anniversary date of the policy inception date for each period succeeding the first year.

For renewal policies issued for a term greater than one year, use the premium tables and rates in effect on the policy renewal date for the first year and the premium tables and rates in effect on each anniversary date of the policy renewal date for each period thereafter.

- 3. For interim premium adjustments or calculations, refer to the Changes rule (Rule 4).
- Apply factors or multipliers consecutively. Do not add factors together except where other Manual rules specifically require factors to be added or subtracted from other factors.

- Apply factors or multipliers to all intermediate calculations and round the result of each step of the calculation (as marked by an asterisk in the example) to three decimal places, unless otherwise provided by a specific Manual rule. Five-tenths or more of a mill shall be considered one mill. (Example: .1245 = .125)
- Apply the appropriate pro-rata term factor to the resulting premium calculated in A.1 through A.5 of this Rule.
- 7. Round the resulting premium for each coverage or exposure for which a separate premium is calculated to the nearest whole dollar. Five hundred mills or more shall be rounded to the next higher dollar. (Example \$1 00.500 = \$101.00, but 100.499 = \$100.00). This rounding to the nearest whole dollar shall occur only once in the premium calculation in determining the final premium for each coverage or exposure.
- B. An insurer may vary the sequence for applying the factor specified in A.6 of this Rule as long as the result of each calculation specified in A.4 through A.6 of this Rule is rounded to three decimal places and the rounding required in A.5 of this Rule is the last step in the premium calculation.

#### Example:

(the sequence of calculation may vary except for the rounding required in A.7 of this Rule as the last step in the premium calculation)

To calculate the Bodily Injury premium for a Class 2C-1 Travis County driver with 10% driver training credit and an additional charge of 15% for a traffic conviction per the Additional Charges rule (**Rule 9**).

B.I.

	575.00
Driver training credit	x .90
	517.500
15% additional charge	<u>x 1.15</u>
	595.125
Round to the nearest whole dollar	\$595.00

#### Rule 3. POLICY MINIMUM PREMIUM

Apply the following non refundable minimum premium for any period of coverage:

- A. Personal Auto Policies—\$25
- B. All other policies—\$50

#### Rule 4. CHANGES

- All changes requiring adjustments of premium shall be computed pro rata.
- B. Addition of any auto or any form of coverage during a policy term—Compute the premium using the rules and rates in effect at the time of the current policy effective date. If the minimum limits required by the Texas Motor Vehicle Safety-Responsibility Act change during the policy period the rates and limits of liability in effect at inception of the policy will apply.

- C. Transfer of coverage from one auto to another during a policy term—Compute the premium using rules and rates for the new auto that were in effect at the original inception date of coverage for that auto.
- D. Transfer of auto principal garaging from one rating territory to another during a policy term—Compute the premium using rules and rates for the new territory that were in effect at the original inception date of coverage for that auto(s).
- E. Change in classification, additional charges or applicable credits during a policy term—Compute the premium using rules and rates in effect at the original inception date of coverage for that auto(s).

Note: If a change outlined in B., D. or E. occurs simultaneously with a substitution of an auto, rates and rules application of Paragraph C applies.

# Rule 5. CONTINUATION OF COVERAGE— CANCELLED OR TERMINATED POLICY

If a policy is cancelled or terminated for non-payment of premium, coverage may be continued as follows:

- A. The policy may be reinstated or renewed at the option of the company without lapse in coverage.
- B. If the company elects to continue coverage for the insured after payment of premium but not to reinstate or renew the policy as set forth in A above, a short term policy may be issued to complete the original policy term in accordance with the procedure set out in the premium development rules at the rules and rates in effect at the inception of such short term policy.
- C. In lieu of the procedures set out in A or B above, the company may issue a new full term policy in accordance with the policy term and premium development rules.

Except as provided for in A above, no cancelled or terminated policy may be reinstated.

#### Rule 6. CANCELLATIONS

#### All Policies—Computation of Premium

This provision applies when a policy, auto or form of coverage is cancelled.

- A. Subject to the Policy Minimum Premium rule (Rule 3), compute return premium pro rata.
- B. Examples for Use of Pro Rata Table:

			P/R Factor
1.	Earned Basis		
	a. Cancellation September 22, 2003 Policy Effective Date:	Date:	.726
	July 6, 2003		512

	b. Cancellation	Date:	
	March 7, 2004		1.181
	Policy Effective Date:	_	956

December 15, 2003

.225

When the factor for the cancellation date is less than the factor for the policy effective date add unity 1.

#### 2. Unearned Basis

a. Policy Effective Date: July 6, 2003 Policy Expiration Date: July 6, 2004 1.512 Cancellation Date: September 22, 2003 -.726.786 b. Policy Effective Date: December 15, 2003 Policy Expiration Date: December 15, 2004 .956 Cancellation Date: March 7, 2004 -.181 .775

When the factor for the policy expiration date is less than the factor for the cancellation date add unity 1.

**Note:** As it is not customary to charge for the extra day (February 29 <sup>th</sup>), which occurs one year every four years, this table shall also be used for each such year.

### Rule 7. UNINSURED/UNDERINSURED MOTORISTS COVERAGE

A. Owners (coverage Code: Refer to the Statistical)

Plan)—Uninsured/underinsured motorists coverage must be provided when liability coverage is written for the owner of an auto or trailer that is registered or specifically garaged in Texas unless rejected in writing by the named insured.

Once rejected, the coverage is not required under subsequent renewals issued by the same company or affiliated insurer, unless requested by the named insured in writing.

- B. **Non-owners** (Coverage code 9900)
  Uninsured/underinsured motorists coverage may be provided for a non-owner under a Named Non-owner or Named Operator-Governmental Employee Policy.
  Charge the rate applicable for the first auto for owners.
- C. Limits—The minimum limit is that limit which is required by the Texas Motor Vehicle Safety-Responsibility Act. Coverage is to be provided on a split limit basis only.
- D. Deductible—Property damage liability coverage is subject to \$250 deductible.
- E. **Modification**—Do not modify the premium under any rating plan or other manual rule provisions.
- F Rates—Refer to the appropriate rate section. If liability rates are based on private passenger liability rates, use the private passenger rates. For all others, use the truck, tractor, trailer or public transportation rates.

#### Rule 8. PERSONAL INJURY PROTECTION

 Owners—Personal injury protection must be provided when bodily injury liability coverage is written for the owner of an auto or trailer principally garaged in Texas, unless specifically rejected in writing by the named insured.

> Once rejected personal injury protection is not required under subsequent renewals issued by the same company or an affiliated insurer, unless requested by the named insured in writing.

- B. **Non-owners**—Personal injury protection coverage may be provided under a Named Non-owner Policy. Refer to the Named Non-owner Coverage rule (Rule 45).
- C. Rates—Refer to the appropriate Personal Injury Protection Rate pages. For private passenger autos and autos classified and rated as private passenger autos use the rates in Table A or Table B of the Private Passenger Rate Section. For risks written at a percentage of private passenger rates, such as motorcycles, use the rates in Table B of the Private Passenger Rate Section unless specified otherwise in the rule.
  - NOTES: 1. If personal injury protection insurance is afforded for more than one auto covered under the same policy owned by an individual or husband and wife resident in the same household, apply the personal

- injury protection rate in Table A to only one auto.
- Apply applicable rating factor(s) to the base rate before entering table for personal injury protection, except for private passenger autos eligible for credits under the rules in the Private Passenger Chapter.

The limit of liability is \$2,500 per person, per accident.

#### Rule 9. ADDITIONAL CHARGES

A. Additional charges are applicable to all risks.

#### B. Experience Period

The experience period is the 36 months immediately preceding the date of the policy.

#### C. Apply Additional Charges for

- each accident involving the applicant, named insured or any other person who operates the auto(s); and
- each conviction involving the applicant, named insured or any other person who operates the auto(s).

#### D. Additional Charges for Accidents and Convictions

#### 1. Accidents

- c. as a result of which the applicant or other person who usually drives the applicant's auto obtained a judgment against, or a settlement from or on behalf of, the owner or operator of another auto involved in such accident if the judgment or settlement was obtained prior to the date of application or in case of renewal, prior to the effective date of the renewal policy, and provided no judgment was obtained against or any amount paid in settlement by or on behalf of the applicant or other person who usually drives the applicant's auto as a result of such accident; or
- d. in connection with which neither the applicant nor other person who usually drives the

- applicant's auto was convicted of a moving traffic violation and the owner or operator of another auto involved was so convicted; or
- e. resulting in the payment of a personal injury protection loss only.

#### 2. Convictions

- B. Determine the classification rating factor and class code as follows:
  - Determine whether the risk is classified as fleet or non-fleet according to the Trucks, Tractors And Trailers Classifications rule (Rule 53).
  - Determine the primary rating factor from the trucks, tractors and trailers classifications rule (Rule 53) based on size class, business use class and radius class
  - 3. Determine the secondary rating factor, if any, from the trucks, tractors and trailers classifications rule (Rule 53) based on the special industry classifications.
  - Determine the combined rating factor by adding the secondary rating factor to, or subtracting it from, the primary rating factor.

### TRUCKS, TRACTORS, TRAILERS

For trailers used with light trucks that regularly operate beyond a 200-mile radius, use the rating factor for the intermediate rating class.

#### C. Premium Development

- For fleet, multiply the base premium by a factor of 1.10.
  - b. Multiply the base premium by the combined rating factor.
  - If additional charges for accidents and convictions (Rule 9) apply, increase the rates determined above by the appropriate percentage.

#### 3. Personal injury protection coverage

- Refer to the Truck, Tractor, Trailer Rate Section.
- b. Primary and secondary rating factors do not apply.
- If additional charges for accidents and convictions (Rule 9) apply, increase the rates determined above by the appropriate percentage.

## 4. Uninsured/underinsured motorists coverage

# Rule 52. PREMIUM DEVELOPMENT—ZONE RATED AUTOS

- A. Except for light trucks and trailers used with light trucks, this Rule applies to trucks, tractors and trailers regularly operated beyond a 200-mile radius from the street address of principal garaging.
- B. Determine the zone or zone combination and code for each auto as follows:
  - When an auto is principally garaged in a regional zone and operates from terminals in that zone and in one or more metropolitan zones, the zone combination is the regional zone and the metropolitan zone farthest away.

- In all other situations, the zone combination is the zone of principal garaging and the zone of the terminal (included in the auto's operations) farthest from that point.
- A terminal is any point at which an auto regularly loads or unloads. It is not limited to a terminal facility that the insured owns and operates.
- The zone-rating table that applies is that table for the zone in which the place of principal garaging is located.

### Example:

A truck garaged in Dallas, Texas takes zone-rating table 09. The zone for the farthest terminal is selected from those listed in zone rating table 09, as determined by the application of paragraphs 1, 2, and 3 above, and reference to the long distance zone map.

### C. Premium Development

- Determine the classification rating factor and class code as follows:
  - Determine whether the auto is classified as fleet or non-fleet according to the Trucks, Tractors and Trailers Classifications rule (Rule 53).
  - b. Determine the primary rating factor from the Trucks, Tractors and Trailers Classifications rule (Rule 53).

#### 2. Liability coverages

- a. Determine the liability base premiums for the zone combination from the zone-rating table.
- Multiply the base premium by the zone-rating factor from the primary classification table in the Trucks, Tractors and Trailers Classification rule (Rule 53).
  - For fleet, multiply the base premium by a factor of 0.70.
- If additional charges for accidents and convictions (Rule 9) apply, increase the rates determined above by the appropriate percentage.

## 3. Personal injury protection coverage

- b. Primary and secondary rating factors do not apply.
- If additional charges for accidents and convictions (Rule 9) apply, increase the rates determined above by the appropriate percentage.

# Rule 53. TRUCKS, TRACTORS AND TRAILERS CLASSIFICATIONS

#### A. Fleet—Non-fleet Classifications

- Classify as fleet the autos of any risk that has five or more self-propelled autos of any type that are under one ownership.
- Do not include mobile equipment insured on a General Liability Policy in determining if the risk is a fleet.
- Do not include trailers in determining if the risk is a fleet, but apply the fleet classification to the trailers if the risk otherwise is classified as a fleet.
- 4. Classify the autos of any other risk as non-fleet.
- Do not change the fleet or non-fleet classification because of mid term changes in the number of owned autos except at the request of the insured, in which case the policy must be cancelled and rewritten in accordance with the Changes rule (Rule 4).

#### **B. Primary Classifications**

- Gross vehicle weight (G.V.W.) and gross combination weight (G.C.W.) mean:
  - a. G.V.W.—The maximum loaded weight for which a single auto is designed, as specified by the manufacturer.
  - G.C.W.—The maximum loaded weight for a combination truck-tractor and semi-trailer or trailer for which the truck-tractor is designed, as specified by the manufacturer.

#### 2. Size class

A vehicle with a gross vehicle weight in excess of 26,000 lbs. (48,000 lbs. or more for farm vehicles) designed to carry goods or materials (cargo), is not eligible for assignment through the association.

- a. Light trucks—trucks that have a gross vehicle weight (G.V.W.) of 10,000 lbs. or less.
- b. Medium trucks-
  - (1) Trucks that have a gross vehicle weight (G.V.W.) of 10,001–20,000 lbs.
  - (2) Include crawler type trucks in this class.
- Heavy trucks—trucks that have a gross vehicle weight (G.V.W.) of 20,001–26,000 lbs. farm trucks 45,000 lbs.
- d. Extra-heavy trucks—farm trucks that have a gross vehicle weight (G.V.W.) over 45,000 lbs. and less than 48,000 lbs.
- Truck-tractors—a truck-tractor is a motorized auto with or without body for carrying commodities or materials, equipped with a fifth wheel coupling device for semi-trailers.
  - Heavy truck-tractors—truck-tractors that have a gross combination weight (G.C.W.) of 26,000 lbs. (farm truck-tractors 45,000 lbs. or less).

## TRUCKS, TRACTORS, TRAILERS

- (2) Extra-heavy farm truck-tractors—farm truck-tractors that have a gross combination weight (G.C.W.) over 45,000 lbs. and less than 48,000 lbs.
- f. Semi-trailers—a semi-trailer is a trailer equipped with a fifth wheel coupling device for use with a truck-tractor, with a load capacity over 2,000 lbs. This includes bogies used to convert containers into semi-trailers.
- g. Trailers—any trailer with a load capacity over 2,000 lbs. other than a semi-trailer.
- h. Service or utility trailer—any trailer or semitrailer with a load capacity of 2,000 lbs. or less.
- If a bus is to be rated as a truck, determine the size class from the seating capacity as follows:

Seating Capacity	Size Class
1–8	Light
9–20	Medium
21–60	Heavy
over 60	Extra Heavy

3. **Business use classes**—If an auto has more than one use, use the highest rated classification unless 80% or more of the use is in a lower rated activity. In that case, use the lower rated classification.

However, if there is a change in actual use of the auto during the policy period the classification shall be amended accordingly.

- a. Service use-includes
  - (1) Autos used for transporting the insured's personnel, tools, equipment and incidental supplies to or from a job location; or
  - (2) Autos used primarily in connection with an insured's own farming or ranching operations; or

Note: (1) and (2) above are confined to autos principally parked at job locations for the majority of the working day.

- (3) Autos used to transport supervisory personnel between job locations; or
- (4) Autos driven by salesmen or driven principally to and from work or used for pleasure.

This classification applies to autos that have reduced exposure because their use is closely associated with the installation or service of appliances, fixtures, equipment, and other products. It includes autos used by artisantype risks, such as carpenters, plumbers, and contractors, other than those eligible for Personal Auto Policy coverage. The delivery of a product to be installed or that has been repaired does not disqualify the auto from this classification.

# TRUCKS, TRACTORS, TRAILERS

- Retail use—autos used to pick up property from, or deliver property to individual households.
  - Deliveries of heating fuel, milk, groceries, drugs, and laundry are examples of the exposures in this classification. This class also includes parcel post and mail delivery where deliveries are only to private households.
- c. Commercial use—Truckers and autos used for transporting property other than those autos defined as service or retail.
- 4. **Radius class**—determine radius on a straight line from the street of principal garaging.
  - a. Local—up to 50 miles—The auto is not regularly operated beyond a radius of 50 miles

- from the street address where such auto is principally garaged.
- Intermediate—51 to 200 miles—The auto is operated beyond a radius of 50 miles but not regularly beyond a radius of 200 miles from the street address where such auto is principally garaged.
- c. Long Distance—over 200 miles—The auto is operated regularly beyond a 200-mile radius from the street address where such auto is principally garaged. Apply zone rates for other than light trucks.
- Primary classifications—Refer to the Fleet, Nonfleet Primary Classifications tables.

- The auto is principally garaged in Houston, Texas (Metropolitan Zone 13) and operates in Beaumont, Texas (Southwest Zone 43), the proper zone combination is 13 and 43.
- The auto is principally garaged in Corpus Christi, Texas (Southwest Zone 43) and operates in Dallas, Texas (Metropolitan Zone 09), the proper zone combination is 43 and 09.

#### B. Premium Development

- Determine the classification rating factor and class code as follows:
